

GENERATORS & STANDBY POWER CONFERENCE

EMPERORS PALACE CONVENTION CENTRE, JOHANNESBURG

26 & 27
OCTOBER
2017

Objectives of the conference

- ~ To deliberate on the safety use of generators and standby power
- ~ To deliberate on contractors and installation regulations
- ~ Trends in generators and standby power industry
- ~ To discuss technological innovations in the industry
- ~ To investigate the viability of importing generators
- ~ To discuss risk factors and mitigations plans in generators use
- ~ To highlight the importance of inspection and regular maintenance of generators.
- ~ Address challenges facing the industry

Speakers Include:

Kenneth Gaynor
Generation Director
Cummins

Aubrey Nkadimeng
Sales Engineer
EIE Group

Gerardo Cammarata
Managing Director
Maverick Generators

Michael van Niekerk
Chief Executive Officer
ASP Fire

Pierre Snyman
Business Development Manager
Aksa Power Generation SA

Media Partners

Organised by

GENERATORS & STANDBY POWER CONFERENCE

26 & 27 October 2017
EMPERORS PALACE
CONVENTION CENTRE
JOHANNESBURG

Conference Background

There is no doubt that the uptake of generators and standby power is increasing as companies aim to address the interrupted grid energy supply. This is despite the generator industry facing various challenges owing to the struggling south African economy. The increase in this uptake can be attributed to poor maintenance of ageing substations, unstable transformers, cable theft and overloading on the national power grid amongst other reasons.

With the construction and mining sectors being the biggest spenders on generators and standby power, scaling back on equipment and big projects spending has been noted in these sectors. This has impacted negatively on the output from these sectors.

Traditional standard generators remain a standard solution for most companies in the country although other alternative sources of energy are being explored. Various innovations in the generators and standby power are gaining momentum with the aim to address the issues of power supply.

While the generators and standby power alternatives are coming in handy in the country, issues such as health and safety, compliance, installation regulations, maintenance are still hot issues that require continuous discussions.

It is against this background that this conference has been organised. Various issues affecting the generators and standby power subject will be discussed. Topics will include, technological developments in generators as backup energy suppliers, importing of generators, risk factors in generators and standby power and mitigation plans amongst other topics. This is a must attend event to all those interested in the alternative standby power.

Aspects to be covered

- Health & safety procedures
- Contractors and installation regulations
- Importing of generators and standby power supplies
- Risk and mitigation plans in generator and standby power use
- Servicing, Inspection and maintenance
- Industry innovations and challenges
- Design and manufacturing specifications
- Investment and opportunities

Who must attend?

- Manufacturers and suppliers
- Generator assemblers
- Contractors
- Engineering companies
- Power management companies
- Standards bodies
- Power & utilities
- Research and development institutions
- Government departments
- Hospitals
- Electricity distribution utilities
- Maintenance managers
- Electro technical departments
- Financial institutions
