

TRANSPORT TELEMATICS & VEHICLE SECURITY CONFERENCE

22 August 2019

Emperors Palace Convention Centre
Johannesburg

Telematics technology: taking the leading role in vehicle security and road safety

Speakers Include:

Eugene Herbert
CEO
MasterDrive

Ben Bezuidenhout
Chief Business Development Officer
DriveRisk

Craig Parker
Regional Director: Programme Manager, Automotive & Transportation, Africa
Frost & Sullivan

Itumeleng Matshego
Managing Director
Legratron Electronics

Philip Bromley
Chairman
The Motor Vehicle Security Association of South Africa (VESA)

Objectives of the conference

- Discuss how telematics is aiding in fuel consumption reduction
- Discuss the updates on certification of Telematics through SABS Standards
- Explore new ways in which telematics technology is combating hijackings
- Discuss how telematics is improving driver behaviour
- Assess how the regulatory framework is promoting the drive towards technology adoption in fleet management.
- To understand how the telematics market has revolved.
- To discuss current technological research and development initiatives in the transport industry
- Case studies of telematics applications

Topics to be discussed include:

- Updates on certification of Telematics through SABS Standards
- Data management and artificial intelligent use in transport industry
- Driver behaviour management
- Fuel consumption reduction
- Impact of telematics and fleet management technology on insurance
- Telematics technology and stolen vehicle recovery
- How telematics is being applied to accident investigation
- Staying ahead of criminals and hijackers- A case Study
- Approaches to risk management in the transport sector
- Real-time vehicle monitoring and tracking
- The future of telematics in south Africa and how far the technology has evolved.
- Current overview on vehicle theft in South Africa

TRANSPORT TELEMATICS & VEHICLE SECURITY CONFERENCE

22 August 2019
Emperors Palace Convention Centre, Johannesburg

Conference Background

We are back again with the 5th Annual Transport Telematics & Vehicle Security Conference to be held on 22 August 2019. This year's edition promises to bring under one roof experts in the transport telematics to discuss how best telematics innovations are can be developed and adopted to ensure maximum road and vehicle safety.

There is no doubt that transport is very essential to both the economy and society. The economy depends on transport and without it, the economy would grind to a halt. However, many facets of transport safety are hindering the moving forward in the transport industry. There is need for unrelenting focus on safety. Issues such as car and truck hijackings continue to be a scourge on South African roads and this trend has logistics companies, fleet management companies and individuals continuously looking for ways to improve the safety of their fleet and vehicles on the road.

Telematics provides one of the most viable options to road safety. The scope of telematics encompasses vehicle tracking, monitoring the location, movements, status behaviour of a vehicle or fleet of vehicles, trailer tracking, automatic driving assistance systems. Newly telematics innovations such as video monitoring are also changing the game in which the fleet can be safely managed. There is no doubt that telematics applications have become integral in equipping fleet managers with driver performance data essential for rectifying driver behaviour that is deemed costly to fuel usage and potential collisions. Telematics can also help reduce the environmental impact of vehicles, with better driving resulting in reduced fuel consumption.

The instalment of the modern ways of fleet management by freight, logistics and individual car owners has not only ensured the safety and security of their vehicles, but also fuel management, insurance bill and improvement in driver behaviour thereby contributing to road safety. Telematics is therefore contributing positively to fuel management, stolen vehicle recovery, accident investigation, road safety and driver behaviour amongst other benefits.

This conference aims to explore the widespread telematics use in South African transport industry, its benefits, and to find more ways in which to make the roads safer for truckers and motorists. Experts will also give in-depth analysis in which car jackers have upped their game and how best to counter this. This is a must attend conference to all those who are involved in fleet management, logistics and those in transport companies

Target audience (but not limited to)

- Lot experts
- Fleet managers/heads
- Freight transport managers/directors
- Fleet specialists
- Chief strategy officers
- Logistics managers
- Risk officers, managers
- Managing Directors
- Operation managers/Directors
- CEOs
- Technical managers
- Heads of operations
- Fleet controllers
- Research and Development executives
- Head of Business Solutions
- Key accounts managers
- Business Development Manager
- Software team lead
- Sales and marketing

- Business Solutions Executives
- Senior sales support
- Road freight controller
- Sea freight controller
- Technology executives
- Health and Safety Managers
- Financial Managers

Sectors to attend (but not limited to)

- Logistics and transport companies
- Navigation and map developers
- Vehicle insurance companies
- Fleet management suppliers
- Road freight Associations
- Freight transport operators
- Telematics technology suppliers
- Municipalities
- Government transport agencies
- Cross Boarder Transport Associations

CONFERENCE FEE

R2,997 Per Delegate Excl. VAT

Conference fee above INCLUDES the following entitlements: Entrance to session, registration pack, daily lunch and refreshment breaks.

Registration fees above EXCLUDES the following entitlements: Travel costs and accommodation.

REGISTER NOW

Terms and Conditions

The following terms and conditions will apply

- Vukani Communication reserves the right, due to circumstances beyond our control, to change speakers, conference content, date and venue.
- The signed registration form is a binding contract.
- No seats will be reserved unless Vukani Communications receives a signed registration form.

SUBSTITUTIONS:

• Delegate Substitution. Substitution is welcome at any time and do not incur any additional charges. Please notify Vukani Communication in writing of any such changes at least 3 days before the date of the event.

• Please note that the speakers and topics were confirmed at the time of publishing however circumstances beyond the control of the organizers may necessitate substitutions, alterations or cancellations of the speakers and/or topics.

• As such, Vukani Communication reserves the right to alter or modify the advertised speakers and/or topics if necessary. Any substitutions or alterations will be updated and sent to you as soon as possible.

• Delegate substitution must be made in writing 7 days before the start of the event.

CANCELLATION:

By signing and returning the registration form, the authorizing signatory on behalf of the stated company is subject to the following terms and conditions.

Charge of 50% of the Registration Fees, plus R700 (+VAT) Administrative charge will be made for cancellations received in writing at least 14 working days prior to the event.

For any cancellations received in less than 7 working days before the date of the event, the full fee will be payable and no refunds or credit notes will be given.

If registered delegate does not cancel and fails to attend the summit, this will be treated as cancellation and no refund or credit will be issued
